---

Sorry for the late notice but this just developed last yesterday. We are trying to come up with plans in case we get extensions to the current RACS contracts.

So please take a look at the attached spreadsheets. You will see 3 additional 6 month increments. Please fill in based on your site schedule whether you will need services to the end of the indicated time segments.

Please, if possible, get this information to me by noon since we have a briefing this afternoon with the front office.

Thanks for your prompt attention to this matter.

Hebert
